B0030 MARINE LOADING ARM

DESIGN FEATURES

- * Sizes from 4" up to 16"
- Pressure ratings from PN 10 up to PN 40
- Materials: carbon steel, low temperature steel, stainless steel
- Temperature range: from -50 °C up to +200 °C
- Customized solutions on request
- EMCO high performance swivel joints

The B0030 marine loading arm is preferred when loading/unloading sea-going tanker ships and its capability has been proven .has been proven with many years of trouble free operation world-wide.

The B0030 with its self supporting design includes a rigid link pantograph balancing system with independent counterweights directly linked to the inboard- and outboard arm. Thus providing that accurate balance is definitely ensured throughout all maneuvring and connecting positions. The self supporting design provides not only high safety standards for easy operation but also lowest possible jetty loads, which minimizes the cost for the jetty itself.

The advantages in comparison with hose loading facilities are ease of handling, higher availability/flexibility, less man power and minimum maintenance required by maximum operational safety and minimized operational cost (cost of ownership).

The B0030 can be manually or hydraulically operated.

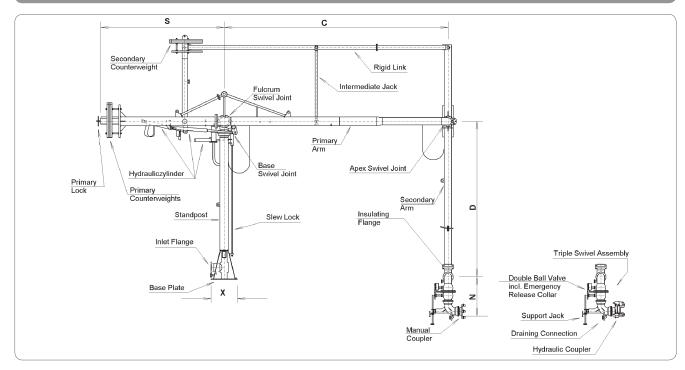

Additional equipment is available.

B0030

16"	7000	1500	11000	11000	1310	6250	4000	224	500

DESIGN

- * Fully balanced with independent counterweights for inboard and outboard arm
- * Self supporting system
- * Less man power due to low weight
- * Swivel joints either welded-in or flanged
- * For transfer of mineral oil, chemicals and liquefied gases (incl. LNG)
- Seals available in Buna-N, Viton, PTFE or other specific materials

ACCESSORIES

- * Range alarm system
- * Drainage connections
- Emergency release system (ERS)
- Hydraulic operation
- Hydraulic or manual quick coupler
- Insulation flange
- * Nitrogen purge line
- * Drain line
- * Vacuum breaker
- vapour return line
